PREVENT TYPE 2 DIABETES WITH THE PreventT2 PROGRAM

What Is Type 2 Diabetes?

Type 2 diabetes is the most common form of diabetes. Most of the food we eat is turned into glucose, or sugar, for our bodies to use for energy. The pancreas, an organ that lies near the stomach, makes a hormone called insulin to help glucose get into the cells of our bodies. When you have type 2 diabetes, your body can't use its own insulin as well as it should. This causes sugar to build up in your blood.

Type 2 diabetes is a serious condition. It can lead to health issues such as heart attack; stroke; blindness; kidney failure; or loss of toes, feet, or legs.

What Is Prediabetes?

Prediabetes is a blood glucose (sugar) level that is higher than normal but not high enough to be diagnosed as diabetes. One in three American adults has prediabetes, and most do not even know they have it. If you have prediabetes and do not lose weight or do moderate physical activity, you can develop type 2 diabetes within 5 years.

Am I at Risk for Prediabetes and Type 2 Diabetes?

You are at increased risk for developing prediabetes and type 2 diabetes if you:

- Are 45 years of age or older;
- Are overweight;
- Have a family history of type 2 diabetes;
- Are physically active fewer than three times per week; or
- Ever had diabetes while pregnant (gestational diabetes) or gave birth to a baby that weighed more than 9 pounds.

If you think you may be at risk, a health care provider can do a blood test to see if you have diabetes or prediabetes.

Can I Prevent Type 2 Diabetes?

Yes! Hearing your doctor say, “You’re at risk for type 2 diabetes,” or “You have prediabetes,” means that you can start preventing type 2 diabetes today. And you do not have to do it alone. Finding the PreventT2 program was your first step on that journey. If you have prediabetes, now is the time for prevention. The Johnson Avenue Hy-Vee’s PreventT2 lifestyle change program can help you take charge of your health to prevent or delay type 2 diabetes.

What is the PreventT2 Lifestyle Change Program?

PreventT2 is part of the National Diabetes Prevention Program, led by the Centers for Disease Control and Prevention (CDC). It is proven to help people with prediabetes prevent or delay development of type 2 diabetes.

What Is the Benefit of Being Part of a PreventT2 Program?

As part of a PreventT2 group, you will work with other participants and a **trained lifestyle coach** to learn the skills you need to make lasting changes. These changes include losing a modest amount of weight, being more physically active, and managing stress.

Being part of a group provides support from other people who are facing similar challenges and trying to make the same changes you are. Together you can celebrate successes and find ways to overcome obstacles.

What Is the Format of the PreventT2 Program?

PreventT2 groups meet for a year — weekly for the first 6 months, then once or twice a month for the second 6 months to maintain healthy lifestyle changes. During each session, your lifestyle coach will teach a lesson and lead a group discussion.

For example, you will learn to:

- Eat healthy
- Add physical activity to your life
- Manage stress
- Stay on track when eating out

Your PreventT2 Lifestyle Coach

PreventT2 **lifestyle coaches** have the experience and training to help you reach your goals. Your lifestyle coach will help you:

- Learn the facts about healthy eating and physical activity and explain how these behaviors will help reduce your risk for type 2 diabetes
- Set and meet your goals
- Build relationships with other participants
- Work as a group to meet challenges

Judy Fitzgibbons, MS, RD, LD

I’m ready and excited to be your PreventT2 lifestyle coach. I know it takes practice to learn new habits. I know it takes trial and error to find the best strategies. I know it takes hanging with the right people to keep it going. This program is designed to provide a setting for all of those to happen. Encouraging you, supporting you, challenging you are all part of

my job as your “coach”. Your job will be to show up, have fun and commit to making healthy changes.

Hy-Vee hired me over 10 years ago to be one of its first in-store dietitians. I’ve offered many services in the store to help you to better health –classes, supermarket tours, individual counseling and healthy food sampling. I’m also the director of our in-store certified diabetes education program. The PreventT2 fits perfectly with Hy-Vee’s mission of ‘Making lives easier, healthier, happier’.

Web Copy (continued)

- Understand and respond to your food cues
- Stay motivated
- Solve problems that can get in the way of healthy changes

For more information about the PreventT2 Curriculum, go to <http://www.cdc.gov/diabetes/prevention/lifestyle-program/curriculum.html>.

PreventT2 Program Features

- Trained lifestyle coach
- CDC-approved curriculum
- Group support
- Year-long program — weekly for 6 months, then 1-2 times a month

Where Can I Participate in a PreventT2 Program?

The Johnson Avenue Hy-Vee Diabetes Education Program offers the PreventT2 program as part of its diabetes services. New groups start in January, March, April and September. Get program details by contacting Judy Fitzgibbons, MS, RD, LD at 319-365-0477 ext. 169 or email jfitzgibbons@hy-vee.com.

Some insurance plans will cover the cost for PreventT2. Check with your insurance provider to see if PreventT2 is covered.

Does PreventT2 Work?

The PreventT2 program can help people with prediabetes cut their risk of developing type 2 diabetes in half. **The Diabetes Prevention Program research study** showed that making modest behavior changes helped participants lose 5 to 7 percent of their body weight — that is 10 to 14 pounds for a person weighing 200 pounds. These lifestyle changes reduced the risk of developing type 2 diabetes by 58 percent in people with prediabetes.
